

I To O- I TO OTHERS

By Iyobosa Osayantin

I T O O Home Cart

Starters

This menu was designed to pick a three course meal for the stranger, but you can obviously pick a single item.

Beef and vegetable soup
€7

Nigerian Pepper Soup
€7
Help a stranger get warm, with a spicy delicious nigerian delicacy, especially at this frosty weather. Fun fact, nigerians eat this, when they feel chilly!!! and guess what it

Kimchi and Dumpling Noodle Soup
€7
Surprise a stranger today by sending them our most popular kimchi and dumpling

Broccoli And Potato Soup
€7

White Balsamic Vinaigrette
€5

I know you think this looks good, why not put a smile on someones face by adding it to cart. This salad is made with good intensions and lots of love.

Add to cart

Vegan Chicken Caesar Salad
€5

"MHMM, now that's what I'm talking about. It's a chicken salad." Add to cart and have someone say these exact same words. Obviously home-made with lots of love.

Add to cart

Panzanella Salad
€5

Make someone happy by sending them this filling salad to brighten their day, we made it with so much joy and happiness.

Add to cart

Hawaiian Chicken Salad"
€5

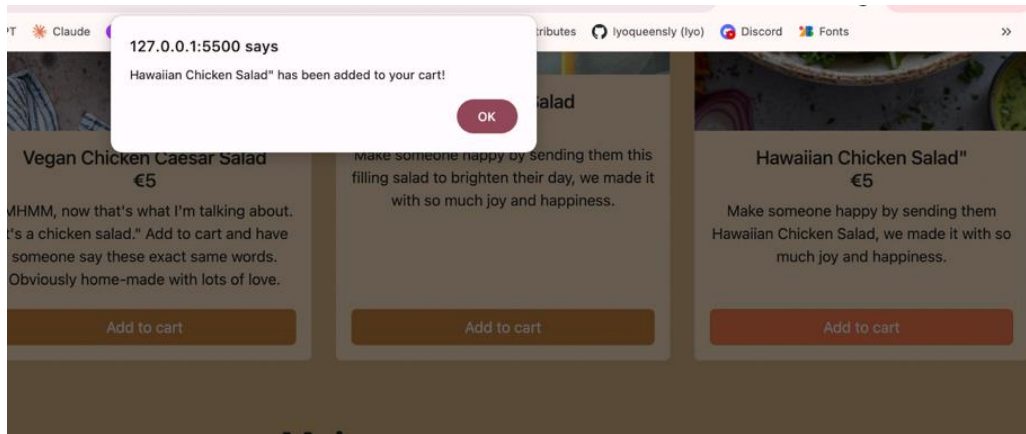

Make someone happy by sending them Hawaiian Chicken Salad, we made it with so much joy and happiness.

The page combines HTML plus Bootstrap, and JavaScript to create an interactive experience similar to a real online shop.

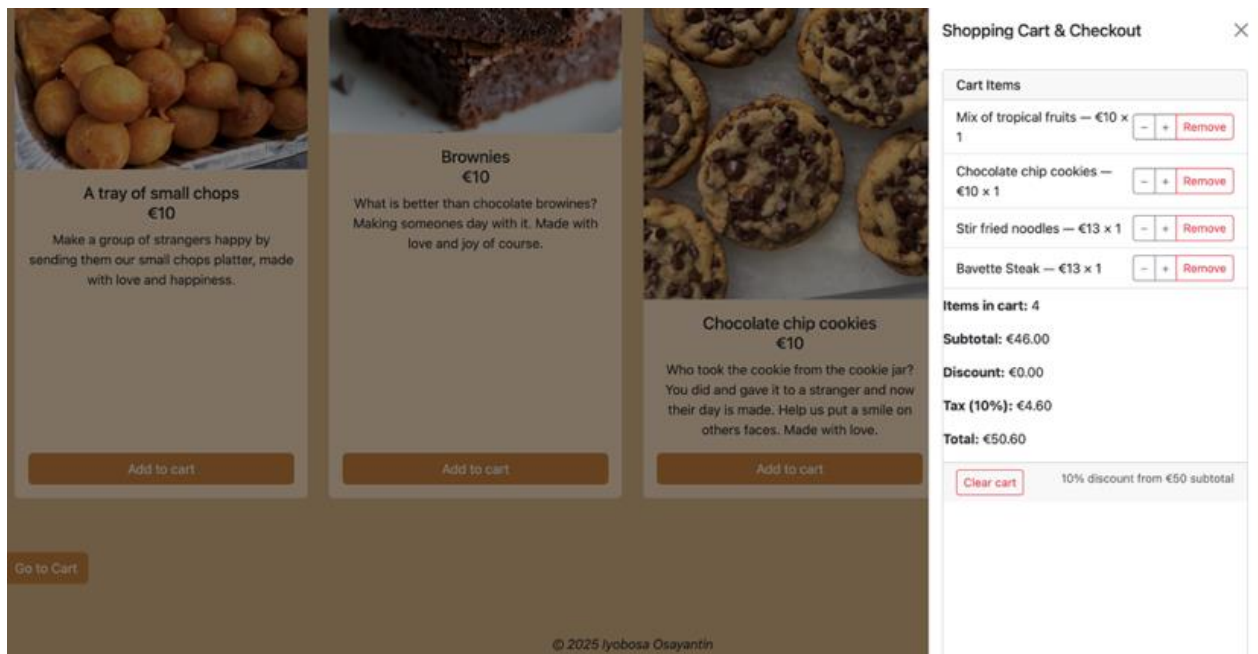

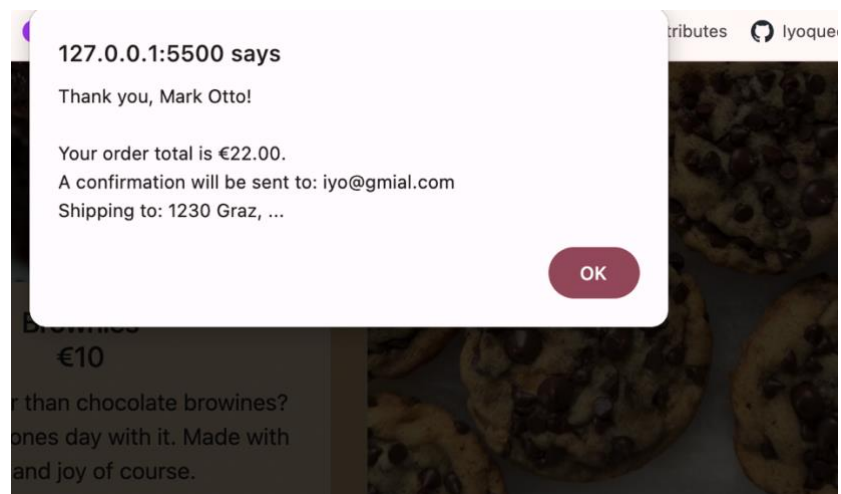

The purpose of this page is to simulate a food donation/ shopping platform, where users can

browse meals grouped by category, add meals to a shopping cart, adjust quantity or remove items, view live price calculations, and complete a checkout form.

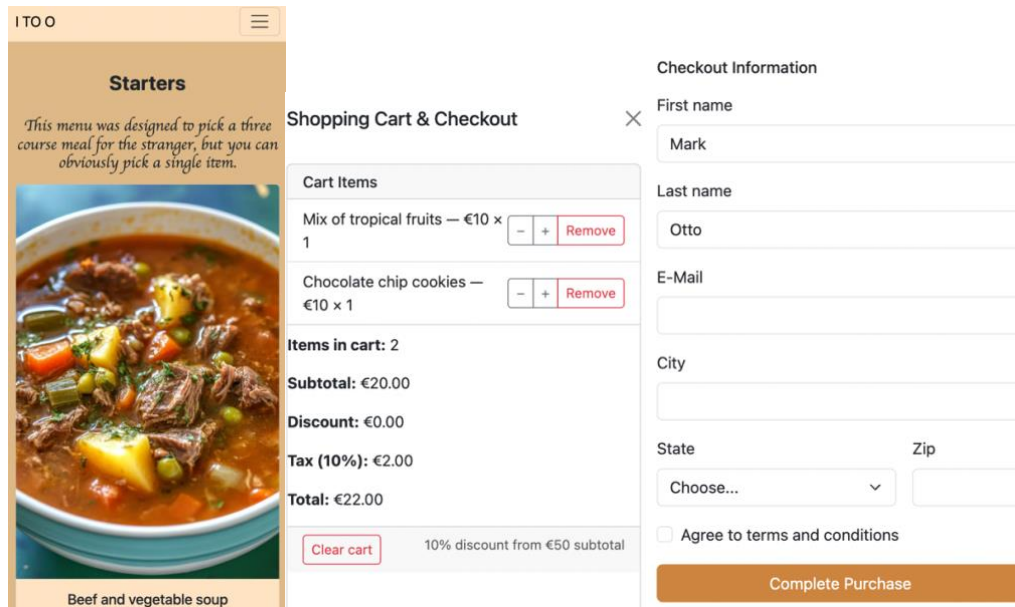

JS to send an alert
after adding an item
to the shopping
cart.

JS to send an
alert after the
purchase has
been made.

Mobile view

Description

1. Navigation bar
 - 1.1. Website brand name, navigation links(static), responsive toggle button for mobile devices.
2. Menu
 - 2.1. Starters, Main, Dessert.
 - 2.2. Each is wrapped in a `<section>` element using Bootstrap card components plus different grid systems to ensure proper responsiveness across all devices.
 - 2.3. Menu Card displays: Meal image, Title with price, Description, and "Add to cart" button
3. Shopping Cart
 - 3.1. Uses Bootstrap Off-Canvas component, which slides in from the right side of the screen
 - 3.2. Cart Items are rendered using a `<template>` element for clean separation and maintenance, and styling
 - 3.3. Each cart item contains: Item name and price, Quantity control (+,-), Remove button
 - 3.4. Cart summary displays: Items in cart, Subtotal, Discount, Tax, and Total

3.5. A clear cart function is also defined in HTML, and JavaScript attaches the behaviour.

4. Checkout Form

4.1. I used the Form component from Bootstrap

4.2. Form contains: First and last name, Email, City, State, Zip code, and Terms and Conditions agreement.

4.3. After successful submission, a confirmation alert is shown, the cart is cleared, and the form is reset.
